BUILDATHON 2026

Enyata x Interswitch

Objective: Build a functional MVP integrating at least one Interswitch API.

PROBLEM STATEMENT

VENDORGUARD: The Financial Trust Layer

Securing Social Commerce in Nigeria

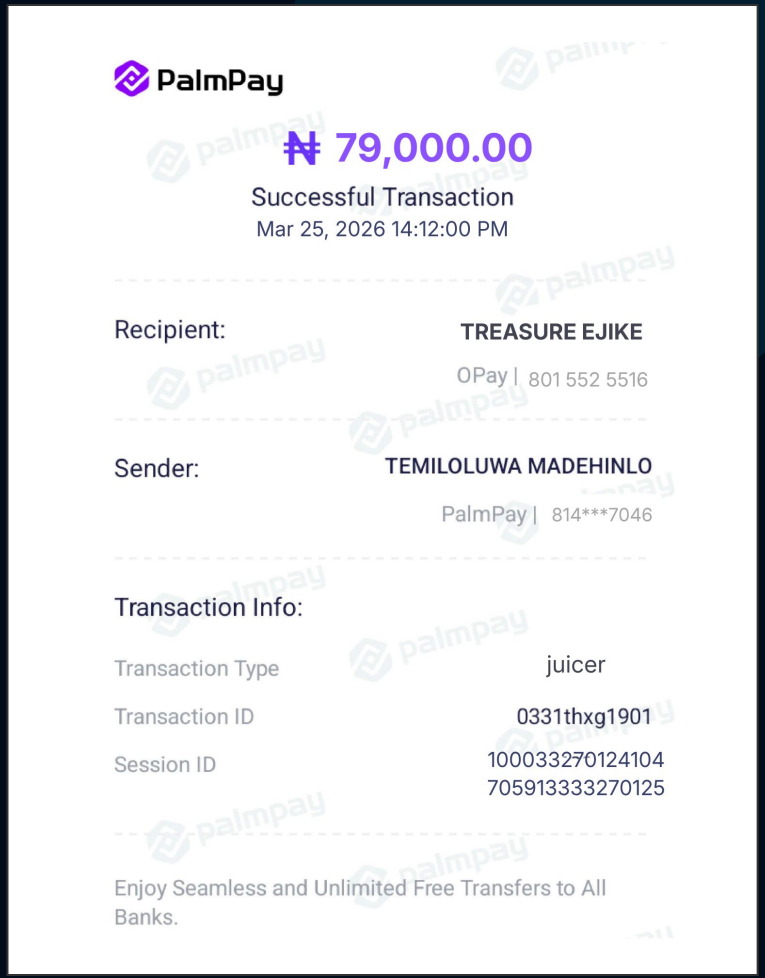
Protecting millions in daily transactions across Instagram, TikTok and WhatsApp DMs by genuine payment confirmation from the buyer.

THE SOLUTION

Instant Verification

From Visual Proof to Technical Proof

Eliminating the screenshot trap with a verification portal. Vendors receive instant confirmation directly from the financial source.



PalmPay

₦ 79,000.00

Successful Transaction

Mar 25, 2026 14:12:00 PM

Recipient: TREASURE EJIKE

OPay | 801 552 5516

Sender: TEMILOLUWA MADEHINLO

PalmPay | 814***7046

Transaction Info:

Transaction Type: juicer

Transaction ID: 0331thxg1901

Session ID: 100033270124104705913333270125

Enjoy Seamless and Unlimited Free Transfers to All Banks.

THE ARCHITECTURE

How It Works

STEP 01

Receipt Upload

Buyer uploads the transaction proof.

STEP 02

Interswitch API

Real-time query sent to the financial network node.

STEP 03

Ledger Match

System verifies the transaction on the bank's ledger.

STEP 04

Vendor Notified

Instant confirmation pushed to the vendor.

A secure, automated loop that replaces manual bank app checks with technical finality.

THE OPPORTUNITY

Market Size

40M+ SMEs

$12B+

Estimated annual social commerce transaction volume in Nigeria, driven by over 40 million SMEs active on social platforms.

A highly scalable B2B enterprise solution.

The future of social commerce is secure. Let's build it together.

BUSINESS MODEL

Scalability & ROI

THE VALUE PROPOSITION

15m + **100%**

Time Saved — Fraud Prevented

= Exponential ROI

immediate ROI by saving time and preventing fraud.

- Subscription model: low-friction monthly SaaS for unlimited verifications.
- Micro-fee option: pay per verification for lighter usage.
- Scales naturally across Instagram, WhatsApp, and other social selling channels.

Built for the 40M+ SMEs scaling across Nigeria's social commerce landscape.

THE ARCHITECTURE

Technical Architecture

Frontend (UI)

React/Typescript Interface. Vendor Dashboard & payment verification screens.

Backend

Node.js/express server managing webhooks, logic & DB schema.

INTERSWITCH API

Data Engine

AI Trust Scoring model analyzing 5,000+ transaction points.
